PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience building CI/CD pipelines (Jenkins), automating infrastructure with Ansible and AWX, and deploying containerized applications with Docker on Linux environments. Skilled in Python and Bash scripting for release automation, with working knowledge of AWS (EC2, IAM, S3) and Infrastructure as Code practices. Focused on reducing manual effort and improving deployment reliability through automation.

PROFESSIONAL EXPERIENCE

DevOps Engineer

EyesOnCloud Pvt. Ltd.

February 2026 – Present

Bengaluru, Karnataka

- Designed and maintained automated CI/CD pipelines using Jenkins, streamlining what was previously a manual, multistep build & deployment process.
- Automated infrastructure provisioning & configuration management using Ansible and AWX with reusable playbooks.
- Built and managed Docker containers to provide consistent development, testing, and production environments.
- Administered Linux servers, including package management, service configuration, user administration, and system monitoring.
- Developed automation scripts using Python and Bash to eliminate repetitive operational tasks and manual intervention.
- Managed source code repositories and collaborative workflows using Git and GitHub.
- Collaborated with development teams to troubleshoot deployment issues and improve release reliability.
- Created and maintained YAML configuration files for infrastructure automation and deployment workflows.
- Assisted in production deployments while ensuring high system availability and deployment consistency.
- Documented deployment procedures, automation workflows, and operational best practices across the team.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering

KNS Institute of Technology (VTU)

Graduated: May 2025

Bengaluru, Karnataka | CGPA: 8.54 / 10.0

TECHNICAL SKILLS

DevOps & Automation: Jenkins, Docker, Docker Compose, Ansible, AWX, CI/CD Pipelines

Operating Systems: Linux (Ubuntu), Windows OS

Programming & Scripting: Python, Bash, JavaScript (ES6+), YAML

Version Control & Cloud: Git, GitHub, AWS (EC2, IAM, S3 - Basic), Virtual Machines, IaC

Networking & Web: TCP/IP, HTTP/HTTPS, SSH, DNS, Nginx, REST APIs, React.js, Next.js, Express.js

Databases & Tools: MySQL, MongoDB, Firebase (Firestore), Postman, VS Code, IntelliJ IDEA

PROFESSIONAL PROJECTS

End-to-End CI/CD Pipeline for Web Application

Jenkins, Docker, Git, GitHub, Linux, Bash

- Designed & implemented automated CI/CD pipeline using Jenkins for application build, testing, and deployment.
- Configured GitHub Webhooks to trigger automated builds and deployments on every code commit.
- Containerized application using Docker & automated deployments on Linux servers using Bash scripting.

Infrastructure Automation Using Ansible & AWX

Ansible, AWX, Linux, YAML, SSH

- Automated Linux server provisioning and configuration using reusable Ansible Playbooks & AWX dashboard.
- Managed inventories, credentials, job templates, package installation, and service configuration.

Dockerized Three-Tier Web Application

Docker, Docker Compose, Nginx, MySQL, Linux

- Built and deployed containerized 3-tier web app (frontend, backend, database) using Docker Compose & Nginx proxy.

AI-Powered Person Detection & Tracking System

Python, OpenCV, YOLO, Docker, Git

- Developed a real-time person detection application using computer vision (YOLO v8 + OpenCV) containerized with Docker.

CORE COMPETENCIES & LANGUAGES

Competencies: CI/CD • Infrastructure Automation • Configuration Management • Linux System Administration • Containerization • Infrastructure as Code (IaC) • Performance Optimization • Root Cause Analysis

Languages: English (Full Professional) • Hindi (Full Professional) • Nepali (Native/Bilingual)
